
GARDENING

U.S. $39.95

"This new edition of Edible Landscaping *is exactly the book we need now, a volume that is itself as beautiful as it is useful."*

— Michael Pollan, author of *Food Rules*, *In Defense of Food*, *The Omnivore's Dilemma*, and other acclaimed books

"Creating an edible landscape for your home is one of the most rewarding things you can do for yourself and your family. This beautiful volume is an inspirational handbook for the uninitiated and expert alike."

— Alice Waters, founder of Chez Panisse and the Edible Schoolyard programs, and author of *In the Green Kitchen*

Since Rosalind Creasy popularized the concept of landscaping with edibles more than a quarter century ago, interest in eating healthy, fresh, locally grown foods has swept across the nation. Clearly, more and more of us are looking to grow clean, delicious produce at home, create beautiful outdoor surroundings, and save money and natural resources all at the same time.

The original edition of *Edible Landscaping*, published in the 1980s, was hailed as a groundbreaking classic. Now this highly anticipated new edition, in glorious full-color format, offers inspiration, along with the latest design and how-to information, to a whole new generation of gardeners.

Drawing on the author's decades of research and experience, the book presents everything you need to know to create an inviting home landscape that will yield mouthwatering vegetables, fruits, nuts, and berries. The comprehensive Encyclopedia of Edibles—a book in itself—provides horticultural information, culinary uses, plant sources, and recommended varieties; and appendices cover the basics of planting and maintenance, and of controlling pest and diseases using organic and environmentally friendly practices.
